FAMOUS

Apperson Jack Rabbit

Is Built Under a System That Has Not Its  
Equal in America.

A recent visitor, whose business admits him to European automobile plants, told us that our shop practice is virtually identical with that of the most famous foreign factory.

That our highly specialized departments, each of which builds one perfect part, struck more closely at the ideal system than was the case in any other factory he had seen in America.

Our shop system was evolved by us. It is the result of more years of actual experience in building automobiles than any other American plant possesses.

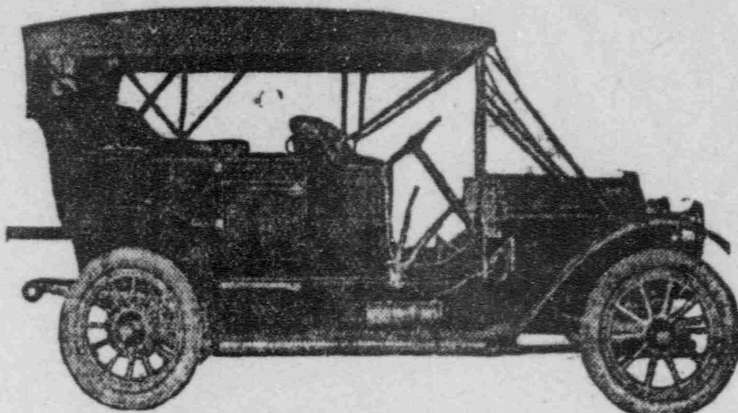

Most of our department heads started with us. We therefore have a stronger corps of old, experienced workmen than is to be found elsewhere.

What does this mean to you as a prospective purchaser? It means everything. We are not "shopping around" for your motor. We are making it. We are making for you everything, literally, from the raw materials. In no other way can you be assured of a car that is absolutely dependable at every point.

It saves you money as well as gives you added comfort, because we get for our customers much more mileage before any overhauling is necessary.

We have many cars that have made from 80,000 to 100,000 miles, and are to-day running as perfectly as when they left the shop.

Leading models for 1910 are 4-30, 5-Passenger Touring Car, \$2,000; 4-40, 7-Passenger Touring Car, \$2,900; 4-50, 7-Passenger Touring Car, \$4,200, and many Roadsters and Runabout types.

Model 4-50—50 H. P., Four-Cylinder, Seven-Passenger Touring Car—\$4,200.  
(P. O. B. Kokomo, Ind.)  
LICENSED UNDER SELDEN PATENT.

REGAL "30"

The Greatest Value for  
the Least Money.

You don't really need to know more about the car you are going to buy save the fact that it is a "Regal—the car of proven quality."

The Regal "30" will do anything that any car can do—pull up any hill, or through any sand—carry you safely, comfortably, anywhere that any automobile can go; give you a speed of forty-five miles, or more if you wish.

And the Regal "30" will not cost you a "mint of money" to own and run. It's simplicity of design and sturdiness of construction have practically eliminated all motor car troubles. This car can be maintained at a minimum cost of upkeep and is built throughout from a superior quality material constructed into perfect mechanical working parts by expert workmen.

REGAL "30" satisfies its owners because it will give them all the speed and power any one can desire. It has all the desirable features in any car listed under \$2,000. Its beauty of design and finish and easy riding qualities are other features that add to the wonderful satisfaction it gives.

Study these six styles carefully; you will inevitably conclude that the era of honest automobile prices is here. Think of it. A big, comfortable, powerful "Thirty" touring car for \$1,250; a stylish, refined coupe for \$1,750; a large, handsome limousine for \$2,650. Yes; these are rock-bottom prices, made possible by a large production.

When you realize that the Regal "30" is the result of three years' concentration on one type of car, you see why it represents the highest point of development in medium-priced cars, the unvarying choice of those who consider both first cost and expense of running.

The Greatest Automobile Value in  
America for the Money.
